

Christian Gutierrez

info@chrisgutie.tech | 201-290-0058 | <https://chrisgutie.tech> | GitHub: Person1080p

Skills

Programming Languages: Java, C#, C, C++, Bash/Powershell, Python, JavaScript, Angular, HTML5/CSS, Couch-Base, SQL, L^AT_EX

Technologies: Linux, SpringBoot, VSCode, Azure Devops, JFrog, Openshift, Google Kubernetes Engine, Docker/K8s, Jenkins, SonarQube, NGINX, systemd, VirtualBox, Windows Server, OWASP ZAP, SSIS

Certifications: CompTIA A+

EDUCATION

New Jersey Institute of Technology

Computer Science

Newark, New Jersey

2019 – 2023

WORK EXPERIENCE

United Parcel Service (UPS)

Software Development Engineer I, DCT-BV/CETD/CVD, Promotion

Parsippany, New Jersey

August, 2022 – Present

- Worked under multiple teams, primarily the CVD Team, and Scrum Master for CETD
- Added Auth0 token validation to CVDPS, a SpringBoot API
- Migrated all 6 BV applications to OCP4/GKE to modernize and enable deployments to the public cloud instead of restricted to on-prem servers
- Integrated a new Dotnet API to start work on a redesign of CVD to display a flyout for tracking packages
- Documented the various maintenance procedures for CETD in an Azure Devops Wiki to provide a centralized place for developers to reference instead of an old Sharepoint server
- Migrated the CETD API to a new internal Windows Server farm due to security concerns setting up firewall rules to the public cloud
- Solved 200+ security flags from package deferrals in Maven and NPM to improve security compliance

Engineering Major Co-Op, DCT-BV

- Worked under the Branded Visibility team as a developer while continuing my education at NJIT
- Fixed 300+ Code Smells detected in SonarQube to improve code quality and readability
- Worked with Devops extensively to begin migration to a new deployment platform
- Increased unit test coverage significantly and written powershell scripts to automate SonarQube scans locally
- Trained a fellow Co-Op on how to use the technologies maintained and developed by our team

Assurance Labs

Web Developer

September, 2022 – December, 2022

- Created a website from scratch for a budding startup and hosting it today on AWS
- Handled customer requests accordingly, and helped applying the required technologies to customer requirements
- Designed in a static html page with dynamic built-in features

PROJECT WORK

TTYR, Raspberry Pi Teletype - HackNJIT 2021 Finalist

- GitHub: <https://github.com/Person1080p/hackNJIT-TTYR>
- Created a small project using a Raspberry Pi and C++ to act like a retro style "dummy terminal"
- Learned how to interface with physical devices in a Linux environment and write a pseudo device driver
- Featured in NJIT's Newspaper: <https://njitvector.com/2021/12/a-zoo-of-hackers-on-campus/>

Host of SIG-Linux

- Taught fellow students how to setup a virtual environment to run a Linux virtual machine
- Compared the pros and cons of various aspects of each distribution like package manager and system daemons

Extra Curricular Activities

NJIT ACM Vice-President

January, 2022 – December, 2022

- Handled tutoring for Computer Science and related courses for the college of computing
- Increased students tutored from 200 to 1200 per semester using various advertising campaigns and optimizing tutor's schedules to students to accept as many available students as possible
- Served as an assistant for the ACM President for various issues pertaining to the club
